Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Farmer (US 6461607).

Claims are drawn to a probiotic, method of making comprising adding a probiotic microorganism to a composition for use in a method of reduction of gastrointestinal Campylobacter infection.

Farmer teaches a probiotic, method of making comprising adding a probiotic microorganism to a composition for use in a method of reduction of gastrointestinal Campylobacter infection. Note column 13, line 5, column 27, lines 1-65 and column 28, line 42. The microorganism can be Lactobacillus acidophilus.

The claims are identical to the cited disclosure and are therefore considered to be anticipated by the teachings therein.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
